DEFINITIONS

Local currency represents the percentage change excluding the impact of foreign currency translation. These amounts are derived by translating current year results at prior year average exchange rates. We believe the elimination of the foreign currency translation impact provides better year-to-year comparability without the distortion of foreign currency fluctuations.

Franchisee Sales represent combined estimated sales of restaurants operated by franchisees, licensees, and unconsolidated affiliates. Franchisee sales, which are not included in the Company sales we present in our Consolidated Statements of Income, generate franchise and license fees (typically at a rate of 3% to 6% of sales) that are included in the Company's revenues.

System sales growth includes the results of all restaurants regardless of ownership, including company-owned and franchise restaurants that operate our Concepts. Sales of franchise restaurants typically generate ongoing franchise fees for the Company at a rate of 3% to 6% of sales. Franchise restaurant sales are not included in Company sales on the Consolidated Statements of Income; however, the franchise fees are included in the Company's revenues. We believe system sales growth is useful to investors as a significant indicator of the overall strength of our business as it incorporates all of our revenue drivers, Company and franchise same-store sales as well as net unit growth.

Same-store sales growth is the estimated percentage change in sales of all restaurants that have been open and in the YUM system one year or more.
